BR-001	Unsupported file formats are accepted without validation during profile picture upload.	Major	High	19/09/2024	Pabasara	The system allows users to upload unsupported file formats (TIFF, PSD) as profile pictures without any validation. This affects the image upload functionality and can lead to incorrect file handling.	The system should reject unsupported file formats and display an error message.	The system accepts unsupported file formats without validation.	1. Go to the user profile page. 2. Click on the "Upload Profile Picture" button. 3. Upload a TIFF or PSD image file. 4. Observe that the file is uploaded without any validation or rejection.	
BR-002	Images exceeding the maximum file size limit are not rejected.	Major	High	19/09/2024	Pabasara	The system does not enforce the maximum file size limit for profile pictures. Images larger than the allowed size (5MB) are uploaded without any error message.	Images exceeding the size limit should be rejected, and the user should be shown an error message.	Images exceeding the maximum size are uploaded without rejection.	1. Go to the user profile page. 2. Click on the "Upload Profile Picture" button. 3. Upload an image file larger than 5MB. 4. Observe that the image is uploaded without any error.	
BR-003	System allows multiple images to be uploaded simultaneously without any confirmation or rejection.	Minor	Medium	19/09/2024	Pabasara	The profile picture upload feature allows multiple images to be uploaded at once, but the system does not reject multiple uploads.	The system should restrict users to one image upload at a time.	Multiple images can upload.	1. Go to the user profile page. 2. Click on the "Upload Profile Picture" button. 3. Select and upload multiple images simultaneously. 4. Observe that multiple images are uploaded without any feedback.
